Why use Longevity EWOT Packages?

Longevity Resources Inc. understands the science of the German research done proving the benefits of EWOT and provide you with the proper equipment. Here are the facts:

1. We understand that you require a system that can provide up to 95% pure oxygen (not 30%).
2. We provide you with an actual EWOT Mask which is absolutely essential for your success with EWOT. Unfortunately other companies do not provide the EWOT Mask and instead, give you simple oxygen tubes for your nose (nose hose or ‘nasal cannula’) or “Aviation Headset” style breathing tubes. Both of these devices will allow at least 1/2 of the oxygen to escape into the room around you dramatically reducing any benefit from performing EWOT. We understand that you need our special EWOT Mask which ensures you breathe all of the oxygen coming from the EWOT system. With a Longevity EWOT System, the mask is included!
3. Just in case you want to use the oxygen system for “Oxygen Bar” use, we also provide you with 5 Nasal Cannulas for free! Don't use these for EWOT, but if you want to sit and enjoy short term oxygen use, like at the Oxygen Bar in Las Vegas, use the Nasal Cannula.

Longevity Resources Inc., 2412 Beacon Ave., Suite A, Sidney, BC V8L 1X4 Canada

Aqua Pro II	<input checked="" type="checkbox"/> UV Sensor and Exposure Guide to ensure each session is performed under Optimal and Replicable Conditions. <input checked="" type="checkbox"/> Automatic Off after 50cc has been Exposed	\$3499.00

6.2 Ultraviolet Cuvettes and Lamps (shipping not included) – Lowest Prices AND an “In Stock Commitment”.

Product	Quantity Ordered	Price Each
Ultraviolet Cuvettes	1 – 49	\$10.50
	50 – 299	\$9.50
	300 +	\$8.50
UV Lamp	UVC Lamp at 253.4 nm Wavelength	\$27.00
	UVA Lamp at 365 nm Wavelength	\$27.00

We have the industries only “In Stock Commitment”. We understand that your business depends upon a reliable source of cuvettes. We carry large stocks and have committed to having them available for you when you need them!

Section 7.0 Ozonated Oils :: HyperOxy Oil™ :: Like No Other!
Highly Ozonated Oils for Topical Use :: Sticks and Jars!

Longevity Resources Inc. offers several types of ozonated oils by bubbling extremely high concentrations of ozone through various types of oil. These products can be used as general healing oils on any skin problems or injuries.

Our HyperOxy™ Olive Oil is available in 30ml 'Sticks' and 50ml jars.

Product descriptions are as follows:

Ozonated Olive Oil – pure Organic Extra Virgin Cold Pressed Olive Oil is infused with high concentrations of ozone and oxygen. Unlike the competitors' products which are often a liquid and at best a "Vaseline" type substance; our ozonated olive oil is a creamy solid at room temperature. This shows you that it contains much more ozone / oxygen than the average product on the market.

Type of Oil	Retail Price 1-11	Wholesale Price 12 +
Ozonated Olive Oil, 50ml jar	\$25.00	\$18.00
Ozonated Olive Oil, 15ml jar	N/A	\$12.00
Ozonated Olive Oil "Sticks" 30ml Stick	\$26.00	\$18.00

Shipping prices are not included. Shipping costs will depend upon the number of jars ordered and the shipping service requested.

Ozonated Olive Oil => Available in 30 ml Sticks and 50ml Jars

Olive oil traps the ozone, providing a cream that remains solid at room temperature. This is far superior to most other ozonated oils that need to be refrigerated to remain solid. Solid at room temperature displays that there is far more ozone in our olive oil than in most others world wide.

Section 8.0 Product Definitions

Not too sure what something is or what it is for? Check below for product definitions....

The New Hyperthermic Chamber

Detoxify while enjoying an awesome healthy and relaxing steam sauna experience

The highest quality single person steam sauna cabinet on the world market; comfortable 10 position seat and outstanding steam and heat distribution from our VORTEX II Steam Generating system. It offers the only digital remote control in the industry, outstanding performance, comfort, and has many safety features. ETL Approved for proven safety and quality.

Cyclone Steam Sauna Cabinet

The same exceptionally high quality body of the Hyperthermic Chamber with the 10 seat positions and easy entry double doors. The Cyclone Sauna uses the *external* Cyclone Steam Generator to deliver exactly the right amount of steam to ensure a comfortable detoxifying steam session. Steam is delivered within 30 seconds of turning on the Cyclone Steam Generator – exceptional quality, amazingly low price!

“Ozone Sauna”

An Ozone Sauna is a combination of our Hyperthermic Chamber Steam Sauna Cabinet or the Cyclone Steam Sauna with one of our EXT Ozone Generators and an oxygen source (either an oxygen concentrator or an oxygen tank). See our pre-chosen Ozone Sauna Packages in Section 1.0 of this price list, or choose your own products to create your own system. Highest quality in the world, longest warranties, competitive pricing, plus a fully trained customer support staff to assist you with any questions.

EXT50 Ozone Generator

The EXT50 offers you the same high quality as the EXT120 and EXT120-T at a lower price. Capable of producing up to 55 ug/ml (7 choices) the EXT50 can be used for any ozone application that requires less than 55 ug/ml such as Ozone Sauna, Ozonating water, and much more. Lifetime warranty and access to our toll free customer support line are included with your purchase.

EXT120 Ozone Generator

This is an ozone generator that produces the entire range of ozone concentrations that you will need (1ug/ml – 120ug/ml) and 70 choices within that range. It is small enough to be extremely **portable**, usually supplied in a **briefcase**. ETL Approved for proven quality and safety, this is an extremely high quality ozone generator with Lifetime Warranty and access to our toll free customer support line.

EXT120-T Ozone Generator

The EXT120-T is the **top of the line** ozone generator. It provides you with 70 choices of ozone concentrations from 1ug/ml - 120ug/ml, just like the EXT120. The major difference however is that the EXT120-T has a built in digital countdown timer to automatically shut down the ozone generator after the preset time has elapsed. The EXT120-T is usually **Wall Mounted**, or used as a Table Top model. ETL Approved for proven quality and safety, this is an extremely high quality ozone generator with Lifetime Warranty and access to our toll free customer support line.

240 Liter Oxygen Tank

This high quality light weight oxygen tank holds 240 Liters of oxygen which you feed into the ozone generator to make ozone. When the tank is empty, it will need to be refilled, however filling costs are only \$10 - \$20.00. The tank is large enough that the oxygen usually lasts weeks to months. (depending on usage of course.) The 240 Liter tank fits into the carrying case with the EXT120.

640 Liter Oxygen Tank

This high quality light weight oxygen tank holds 640 Liters of oxygen which you feed into the ozone generator to make ozone. When the tank is empty, it will need to be refilled, however filling costs are only \$10 - \$20.00. The tank is large enough that the oxygen usually lasts months. (depending on usage of course.)

Oxygen Regulator

The oxygen in your oxygen tank will be at very high pressure. This oxygen regulator “regulates” – speeds up or slows down – the passage of oxygen from your tank. You choose the speed at which you would like the oxygen to exit. This is known as the “oxygen flow rate” that you have chosen. This oxygen regulator provides the following flow rates: 1/32, 1/16, 1/8, ¼, ½, ¾, 1, 2, 3, 4 Liters per minute.

Plexiglas Stand

This is a plastic Plexiglas clear frame that you fasten the ozone generator to. It can be used as a table top stand for the ozone generator, or as a wall mount. Also holds glass bubblers, ozone destruct, and flask. This is suitable for the EXT50, EXT120, or EXT120-T Ozone Generator and accessories.

ABS Briefcase

This is an extremely high quality impact and water resistant briefcase with a lifetime warranty. Specialty foam cut interior provides optimum protection for the ozone generator and oxygen tank in a handy carrying case. Suitable for the EXT50 or EXT120 Ozone Generator (the EXT120-T is too large to fit into the briefcase).

Plexiglas Stand for 50ml Glass Bubblers

A convenient, small, portable stand to accept two of the 50ml Glass Bubblers (see below)

500ml Glass Flask (1/2 Quart) and 1000ml Glass Flask (1 Quart)

This is for ozonating water. High quality scientific glass flask with a hand blown glass top with two tubes on top. One tube accepts ozone from the ozone generator, the other tube allows ozone to escape from the flask once it has bubbled through the water, and feeds this ozone to the ozone destruct unit.

50ml Glass Bubbler

This is a very small glass bubbler with a hand blown glass top. For some of the procedures that you would like to perform with the ozone generator, you may need to “humidify” the gas or add “moisture”, and you can do this by bubbling the ozone through this bubbler before using it.

50ml Glass Bubbler Stand

A small Plexiglas stand designed to hold two of the small 50ml Glass Bubblers in a vertical position; very handy to have if you do not have the Briefcase (that comes with the EXT120) or the large Plexiglas Frame that comes with the EXT120-T.

Glass Cups (2 inch, 3 inch, 4 inch)

The Glass Cups are used to isolate ozone over a certain area. The glass cup has an entrance tube to allow ozone in, and an exit tube to allow ozone out (usually to the ozone destruct unit).

Ozone Destruct Unit

The ozone destruct unit is specially designed to destroy the ozone that comes from the flask when you are ozonating water. This prevents ozone from leaking into the room around you.

Tubing Package

You need oxygen tubing to carry oxygen into the ozone generator from your oxygen tank or oxygen concentrator. You need special silicone ozone resistant tubing to take the ozone from the ozone generator. This “Tubing Package” contains all of the tubing you will require, plus connectors that allow you to connect this tubing to the ozone generator and all of your accessories.

Oxygen Products

Longevity-5 Oxygen Concentrator

Oxygen concentrators concentrate the oxygen from the air that we breathe and supply it at 92-95% purity. 3 year warranty. Flow choices for the oxygen are 1LPM – 5LPM. Concentrates oxygen from room air up to 95% purity to be used for breathing oxygen. You require a prescription from a physician to purchase this instrument.

OxyMax 8 and OxyMax 10 Oxygen Concentrators

The OxyMax 8 and 10 oxygen concentrators concentrate the oxygen from the air that we breathe and supply it at 90-95% purity. Flow choices for the oxygen are 1LPM – 8LPM for the OxyMax 8 and 1 LPM – 10 LPM for the OxyMax 10. Concentrates oxygen from room air up to 95% purity to be used for breathing oxygen, exercising with oxygen, and oxygen bars.

Oxygen Accessories:

1. **Oxygen Bubble Humidifier** – is used to bubble oxygen through distilled water before use. Allows the user to add 'oxygen flavors' to the oxygen at this point to add a pleasant aroma to the oxygen.
2. **Oxygen Misting Brush** – allows the user to perform "Oxygen Facial Misting Treatments" with either the OxyMax 6, OxyMax 8, or the OxySalon. Soothing mist with 95% oxygen is sprayed over the face scented with aromatherapy oils or oxygen 'flavors'. This treatment is thought to be soothing, healing, oxygenating, cooling, rejuvenating.
3. **Full Facial Oxygen Mask** – unlike most oxygen masks that only cover the mouth and nose, the full facial oxygen mask covers the entire face from the top of the forehead to the bottom of the chin. The clear (see through) construction prevents claustrophobia, as the client can clearly see through the mask. The mask allows highly concentrated oxygen to be kept close to the skin for a rejuvenating 'Oxygen Facial'. At the same time the client is also breathing pure oxygen.
4. **EWOT Masks** – the EWOT (Exercise With Oxygen Training) Mask is specially designed with a series of sophisticated valves to ensure that the **all** oxygen coming from the oxygen source is used by the person who is exercising.
5. **Nasal Cannula** – small tubes that hook behind the ears and run across the face to direct ozone up the nose. Also referred to as "Nose Hose".
